Project Structure and Access to Files

This OSF project is structured using multiple components.

The main project page acts as a hub and does not directly contain files.

All scientific and technical materials are available inside the components listed below.

To access files, please click on the corresponding component.

Components Overview

Trattato – Fisica della Ritenzione (ITA)

Canonical Italian version of the treatise (PDF).

Treatise – Physics of Retention (EN)

English mirror version of the treatise (PDF).

Technical Deposit – Software, Hardware, Protocolli

Replicable technical materials, including software, hardware specifications, laboratory protocols, and verification packages (ZIP archives).

Integrity, Hashes and Verification

SHA256 hashes, manifests, and integrity verification files required to independently verify the technical deposits.

Note

This structure follows OSF best practices for complex scientific projects.

All materials are publicly accessible through their respective components.

Author: Pierernesto Di Paolo

Project: Fisica della Ritenzione

Year: 2025
